PROFESSIONAL SUMMARY

Software Developer with 2 years of experience in building enterprise FinTech applications using Angular 15+, RxJS, NgRx, TypeScript, Bootstrap, Ng-Zorro, and Ant Design. Skilled in scalable frontend architecture, state management, RESTful API integration, manual testing, and manual deployment. Detail-oriented and self-motivated, with a track record of delivering clean, maintainable code in Agile/Scrum environments.

SKILLS

- **Programming Languages:** Java, C, JavaScript, TypeScript
- **Frontend Frameworks/Libraries:** Angular 15+, RxJS, NgRx, Bootstrap, Ng-Zorro, Ant Design, React.js
- **Full Stack Development:** HTML, CSS, JavaScript, TypeScript, Java Backend, REST API Integration, Git, GitHub
- **Testing & Deployment:** Manual Testing, Manual Deployment, Postman (API Testing)
- **Methodologies:** Agile, Scrum
- **Tools / Code Editors:** Figma, Postman, Eclipse, VS Code, Curser, Claude Code CLI
- **Databases:** SQL, PL-SQL

EXPERIENCE

Junior Software Developer, Kyzer Software, Pune — **Jan 2025 - Present**

- Engineered and maintained User Management V2, a centralized admin module managing users and role-based access control across the TradeZone Kyzer banking product, deployed live across 8-9 partner banks.
- Re-architected User Management from V1 to V2, redesigning data fetching and rendering logic to cut application load time and boost overall performance efficiency by ~50-60%.
- Implemented role-based access control, dynamic form validations, and RESTful API integrations using Angular 19, Ng-Zorro, and NgRx, improving admin workflow efficiency.
- Developed and maintained various Trade Finance and Banking forms across the TradeZone and TradeKonnect applications, including LC Issuance, LC Amendment, BG Issuance, BG Amendment, Forward Contract Booking, and other banking workflows used across 8–10 partner banks.
- Integrated frontend applications with **RESTful APIs** for data retrieval, submission, validation, and workflow processing, while implementing reusable Angular components and NgRx-based state management for scalable enterprise applications.
- Gained hands-on expertise in Angular component lifecycle, lazy loading, and dynamic routing for banking solutions; performed manual testing and manual deployment across environments.

Software Developer Intern, Kyzer Software, Pune — **Oct 2024 - Jan 2025**

- Developed frontend features in a FinTech environment using Angular and NgRx, contributing to production-grade banking modules.
- Built Pricing Master, a pricing calculator tool for banks to manage product pricing strategies, using Angular 19, Ng-Zorro, and Ant Design's Drag-and-Drop library.
- Implemented authentication and the Super Admin module, including user access control, route guards, and state management with NgRx.

PROJECTS

IseeAI: AI Assistant for Visually Impaired People | *HTML, CSS, JavaScript, React.js, AI*

- Developed an AI-powered assistant to aid visually impaired individuals in daily tasks using computer vision and deep learning.

Weather Application | *HTML, CSS, JavaScript, Bootstrap, REST API*

- Built a responsive weather application integrating a REST API for real-time weather data, with a dynamic background image feature based on the searched city.

EDUCATION

Marathwada Mitra Mandal's Institute of Technology, Pune — **2020 - 2024**

Bachelor of Engineering, Computer Science | CGPA: 8.35

CERTIFICATIONS

- Oracle Generative AI Professional — Oracle
- Programming in Java — LinkedIn Learning
- Full Stack Development — Linkcode Technologies
- Complete JavaScript Course — Udemy
